THE RECORDAK

Portable MICROFILMER

in your own office

in the field

in other departments

The **RECORDAK**

Portable microfilmer

Recordak Microfilming Saves SPACE—Saves TIME...

... and with the Recordak Portable Microfilmer these advantages are at last available to both large and small organizations.

Hours once spent in tiresome copying... descriptions of checks on deposit slips... billing media on statements... making spot or field audits—can be cut to mere *minutes* with the Recordak Portable. You can have photographically accurate records at a fraction of a cent a copy!

Engineering Quality of Recordak Microfilmers...

... is a long-established fact. That quality stems from the research and engineering facilities of Eastman Kodak Company which—to Recordak's specifications—designs and builds the practical, high-precision microfilmers you need.

The Recordak Portable combines compactness and portability—with engineering excellence.

Now the miracle of microfilming comes to every business in this convenient, compact, moderate cost Recordak Portable

opens a whole new world of office efficiency for every s

Outstanding features of the Recordak

▲ Easy to handle:

— Weighs only 24 lbs.—less than an office typewriter! Measures $6\frac{1}{2}$ " x $15\frac{1}{2}$ " x $12\frac{1}{2}$ ". Fits compactly into a handy accessory carrying case. Easy to take to any department where records are to be microfilmed. Saves time and risk of loss in moving records from their location.

▲ Removable film units:

Film units are light-weight and easily removable. Separate departments can have their own units, so that "one subject" records can be kept separate even though microfilming is intermittent. When the film unit is removed from the Portable, a lens cover automatically protects the film from exposure.

size and every type of business

Portable microfilmer

◀ Easy to use:

Documents are fed into the machine face up and returned face down in their *original sequence*. The Portable will accommodate documents 12" wide and of any length. As many as 2500 letters or 6000 checks can be recorded on a single 100 ft. roll of film. Sixty letters or 125 checks can be microfilmed in just one minute.

◀ Two films at once:

With the Recordak Portable, you can expose simultaneously *two* rolls of film—one for immediate use, and a duplicate for auditing purposes or security. Each reel is 100 ft. long.
